SUBZERO BLASTING

WHAT MAKES DRY ICE BLASTING a Better Cleaning Process for Your Facility's Operation?

Reduced Downtime:

- Equipment can be cleaned without disassembly, reducing downtime from days to hours.
- No need to cool down equipment, further speeding up the process.

More Efficient Cleaning:

- Achieves a more thorough clean compared to manual scrubbing.
- Cleans crevices and hard-to-reach areas in tight spaces that are difficult to access by hand.

No Equipment Damage:

- Unlike sandblasting, dry ice blasting is non-abrasive, meaning it does NOT alter the surface structure.
- In-place cleaning eliminates the hassle and risk of damaging equipment by moving equipment to and from a cleaning area.

No Chemicals:

- Uses non-toxic, harmless CO₂ pellets instead of chemical solvents.
- Helps companies meet environmental compliance regulations and improve worker safety.

Less Waste:

- CO₂ pellets sublime upon contact, changing from solid to gas, leaving only the contaminants as waste.
- Significantly lowers the amount of waste requiring disposal.

Improved Safety:

- Safe for the environment, employees, and equipment.
- Ensures a cleaner and safer working environment.
- Dry ice is non-conductive, ideal for cleaning electrical systems without the risk of damage short-circuiting.

COMMITTED TO a Better Way...

With over 25 years of experience in the operation and maintenance of industrial equipment and machinery, I have developed a strong passion for eco-friendly, efficient, and effective blast cleaning and surface preparation. In our early days, we were met with frustration at the inconsistent quality of the dry ice we were getting from third party suppliers. You see, the dry ice blasting process is **VERY MUCH DEPENDENT** upon good quality ice, and using it quickly, as its effectiveness degrades over time. The solution was right in front of us... **MAKE THE DRY ICE OURSELVES**, allowing us to control the quality, and to use it quickly.

So we created Dry Ice Solutions, a sister company to SubZero Blasting Inc., founded in 2015. Both have successfully grown into award-winning and reputable businesses serving clients province wide. The shared purpose is simple...

We are committed to providing reliable, affordable, and innovative dry ice solutions that meet the diverse needs and expectations of our clients.

We're often asked which company does what?

SubZero Blasting Inc. provides:

- All the services, including dry ice blasting and sandblasting services along with protective coating.

Dry Ice Solutions handles:

- Blasting equipment sales and rentals
- Training and consulting
- Dry ice manufacturing. We manufacture and supply high-quality dry ice for various purposes, such as dry ice blast cleaning, food preservation, medical transportation, and entertainment.

TOGETHER, IT'S AN UNBEATABLE COMBINATION.

Gord Giannandrea, President and CEO
SubZero Blasting Inc. & Dry Ice Solutions

OUR MOBILE DRY ICE BLASTING CREW Comes to Your Facility... and the Results are Incredible

We do this every day, and we're even consistently amazed by the "before" and "after" results...

THE BEST DRY ICE BLASTING NEEDS the Best and Freshest Dry Ice

THE FRESHEST DRY ICE IN ONTARIO

At Dry Ice Solutions, we produce and sell only the freshest dry ice in Ontario, essential for various applications.

✓ Dry Ice Blasting:

Fresh dry ice ensures effective cleaning, reducing downtime and achieving superior results.

✓ Pharmaceutical Industry:

Maintains ultra-low temperatures for transporting and storing temperature-sensitive medications, ensuring their stability.

✓ Food Industry:

Preserves perishable items during transport and enhances culinary presentations with dramatic effects.

OUR COMMITMENT

We provide high-quality dry ice tailored to your needs, whether for blast cleaning, pharmaceuticals, or food preservation.
