

DRY ICE BLASTING...

A Mining Equipment Maintenance

GAME-CHANGER

Dry ice blast cleaning is a powerful, efficient, and environmentally friendly solution for maintaining critical equipment and infrastructure.

By effectively removing grease, oil, coal dust, and corrosive residues without damaging equipment, it reduces downtime and extends machine life while meeting safety standards like ISO and MSHA.

THIS INNOVATIVE METHOD OFFERS SEVERAL KEY BENEFITS:

Non-Abrasive Cleaning

- ✓ Ideal for delicate components like sensors, electrical systems, and hydraulics

Environmentally Friendly

- ✓ Leaves no secondary waste and is made from reclaimed CO₂

Enhanced Safety

- ✓ No chemicals mean a safer environment for workers

Deep Cleaning

- ✓ Reaches tight spaces in crushers, ventilation shafts, and pulleys without dismantling

Cost Savings

- ✓ Reduces maintenance costs by preventing buildup and corrosion

Fire Risk Reduction

- ✓ Eliminates flammable residues, especially important in coal mining

BEFORE

AFTER

DRY ICE BLASTING protects your mining equipment by keeping it running efficiently, extending its lifespan. It's adaptable to extreme environments, and meets regulatory requirements. And it's **FAST...**

↓ **DOWNTIME** = ↑ **PRODUCTIVITY**

Real World APPLICATIONS

From crushers to conveyor belts and beyond, our ability to clean without disassembly saves time and boosts productivity.

1

Processing Plants

Keeps crushers, mills, and other equipment clean and operational.

2

Ventilation Systems

Maintains air quality and reduces respiratory risks.

3

Conveyor Belts

Removes buildup that affects alignment and performance.

4

Mobile Equipment

Cleans trucks and loaders without the need for disassembly.

5

Systems

Safely cleans motors and wiring, thanks to its non-conductive properties.

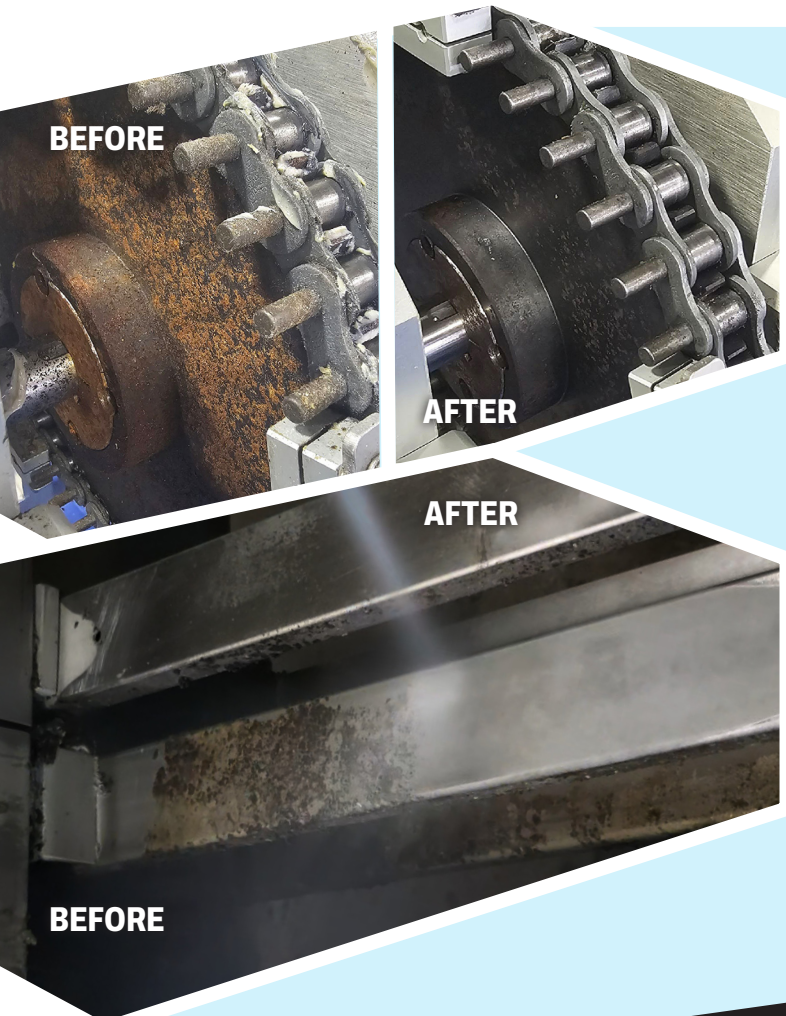

PROVEN RESULTS

Dry ice blasting delivers real results:

- A coal mining operation reduced downtime by 25% by cleaning conveyor systems more effectively.
- An iron ore mine saved millions by extending the life of crushers and mills by 40%.
- A gold mine improved air quality and safety with cleaner ventilation systems.

Dry ice blasting is simply the smarter choice for ongoing maintenance in the mining industry.

It's effective, efficient, and sustainable—exactly what you need to stay competitive and safe.

FREE DEMO & CONSULTATION AVAILABLE

As a special promotion, for pre-qualified future clients, **A LIMITED NUMBER OF FREE DEMOS ARE AVAILABLE.**

We'll come to your factory/facility, and show you live and in-person how Dry Ice Blasting can be a **BETTER, FASTER and SAFER** part of your regular equipment and machinery maintenance program.

**CALL TODAY
905-396-4151**

to see if you qualify for an appraisal and a **FREE DEMONSTRATION**
